BARTY
the right mix

Easy.

The perfect mix in one touch.

Given the extraordinary **intelligence applied** to
the machine and to its control system,
Barty is very easy to manage and to set up.
Its **dedicated mobile app** is easy and instant,
in just a few taps you get the desired result.
The perfect mix, your mix.

***Many functions, no buttons:
Barty does it all by itself in one
tap on the device or tablet
to access all its functions.***

BARTY
the right mix

Fast.

Let it work, it will surprise you.

The **latest generation processor** and the rapid hydraulic system inside the machine, allow to achieve incredible results in a very short time. Barty gives the time **to think of new strategies** and new recipes, taking on the more mechanical and repetitive work phases. Never stopping and without delays!

Barty prepares up to 300 drinks per hour, each of the same standards of costs and quality.

BARTY
the right mix

Precise.

It runs like clockwork.

Barty is precise and at the same time adapts to you and your way of making drinks and cocktails. Its flawless performance gives the mixologist time to focus on creative presentations and surprising details, who this way adds a touch of his exclusive style.

Barty guarantees the output as to the set quantity and the perfect consumption control, without wasting a drop.

All trademarks are the property of their respective owners.

Compact.

Wherever it is, finds its space.

Barty is **as big as a compact coffee machine** or a drink dispenser. In all situations, all conditions it is at ease and finds its space. Does not **need space planning** or installation. It just needs energy source and your creativity to do its best work.

Barty is the smallest device for automated mixing on the market. Ultra-light body and very small dimensions make it suitable for any kind of context.

Please ask us...

We don't need, already have a barman in our team.

Barty **is an ally**, not a substitute.
It is intended **to support the professionals** in alcoholic and alcohol-free drinks making, and even more. Precise and reliable allows to boost, increase, and speed up the work performance of professional bartenders.

It's so complicated, I'm not a professional.

You **don't need to be an expert** or have a specific knowledge for using Barty: its mobile app is simple and intuitive, allowing to set up and manage it independently.
In addition, **it stores personalised cocktails**, monitors outputs, provides consumption statistics.

In case it breaks down how do I proceed?

Barty is designed to **reduce downtime** caused by technical problems or faults: its intelligent sensor system sends alerts directly to your app and shows display messages in case when bottles replacement or cleaning is necessary. In the event of disrepair, it will be enough to fill out the **request online** to have a replacement in a short time.

BARTY
the right mix

...in addition.

This kind of devices are so space consuming.

With its dimensions **30 cm in length, 40 high and 32 wide**, Barty perfectly suits all occasions.
The bottles can be positioned in sight or hidden behind, and due to its light weight of **only 6 kg** it can be easily transported everywhere to offer its best service on every occasion.

The devices make a few recipes.

His **capabilities are inexhaustive**: the app updates automatically the list of available cocktails guided by the online Cookbook, **always enriched with new recipes** and original preparations by high-level professionals from the world of mixology.
You can customise them or save your secret recipes in memory.
They will always be only yours.

Born to surprise.

Barty was born from a challenge: **does the perfect mixology exist**?
The answer to it finds the project carried out by a team of high-level engineers, thereafter improved following the considerations of hotel managers and experienced international bartenders, field-tested with the specific market research and analysis.
The **intelligent technology within everyone's reach**, offers high and permanent quality, accurate and fast service

Prototipia.

We invent smart objects and integrated solutions to facilitate working processes.

Prototipia is an innovative start-up founded by four curious intellects. We study the market, analyse the critical points and develop IoT solutions prototypes. We sense the real needs of our potential customers and develop our projects with them and for them.
Accordingly, only the prototypes that have passed practice tests, enter the phase of serial production and commercialisation on the market.
